

Professor Feedback Form Report

Report for: Professor John Smith

Summary

- Overall sentiment analysis shows a balanced feedback distribution, with positive sentiment being the most prominent.
- Feedback suggests a strong level of engagement with students, with an average score of 4.2 out of 5.
- Areas of improvement include incorporating more real-life examples into lectures and providing more opportunities for student participation in class activities.
- Sentiment analysis over the years indicates a generally positive trend, with fluctuations in neutral sentiment.

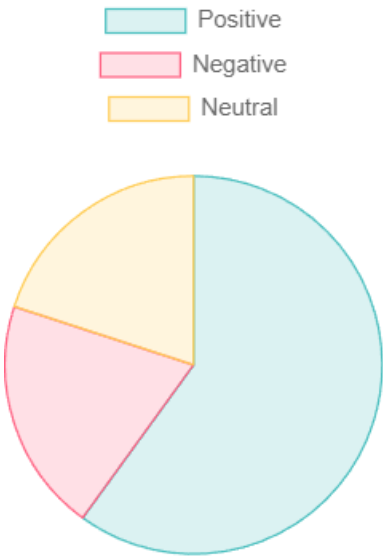

Average Score Per Parameter

Parameter	Average Score
Clarity of Explanation	4.5
Engagement with Students	4.2
Interactive lectures	4.0
Quality of Assignments	3.8
Syllabus being taught in-depth	4.0

Detailed Analysis and Areas of Improvement

- Incorporate more real-life examples into lectures.
- Provide more opportunities for student participation in class activities.
- Give more in-detail assignments that help the students revise the syllabus.
- Use animations if required to help students that learn visually
- The assignments are too lengthy and time consuming. Shorten them to cover only important points.
- Take separate lectures for clearing assignment doubts, if any.
- Give proper time for assignment completion.
- Overall performance improved overtime.
